

RBC European Equity Focus

Quarterly Commentary

The RBC European Equity Focus strategy returned -6.2% over the quarter, underperforming its benchmark, the MSCI Europe (Net)(EUR) Index, which returned -4.3%.

Stock selection was the main source of the underperformance. Software company Micro Focus International was the biggest detractor from returns. Its CEO departed only months into the role, and the company issued a sales warning. Paddy Power Betfair, Danish pharmaceutical Novo Nordisk and Dutch financial ING also detracted from returns. Positive contributions over the quarter came from Ryanair which saw a sharp rise in earnings, London Stock Exchange which had a strong start to 2018 and Dutch semiconductor company ASML.

We are, as always, cognisant of the wider macro environment both for its challenges and opportunities. Our focus remains on the discipline of long term investing in companies with strong competitive positions, low capital intensity, sustainable and/or improving profitability and the right management strategy and governance.

Investment Performance

Calendar Year (%)	2017	2016	2015	2014	2013	Cumulative SI
Strategy (Gross)	14.04	-6.36	-	-	-	6.86
Benchmark	10.24	2.58	-	-	-	0.48

Description of the Firm: For the purposes of Global Investment Performance Standards (GIPS®), RBC Global Asset Management is the asset management division of Royal Bank of Canada (RBC), operating under the following brands: RBC Global Asset Management (RBC GAM) in Canada, the U.S. (institutional), the U.K. and Hong Kong; Phillips, Hager & North Investment Management (institutional); and BlueBay Asset Management (institutional). With offices around the world, RBC GAM offers a full range of global investment solutions in cash management and fixed income, equity, balanced, alternative and specialty investment strategies through mutual funds, hedge funds, pooled funds and separately managed accounts. The RBC GAM group of companies has more than C\$417 billion (US\$331 billion) in assets under management as at December 31, 2017. RBC purchased Phillips, Hager & North Investment Management, including the assets of BonaVista Asset Management, on May 1, 2008, and BlueBay Asset Management on December 17, 2010. A complete list and description of the firm's composites and performance results is available upon request.

Compliance Statement: RBC GAM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. RBC GAM has been independently verified for the periods January 1, 2002 through December 31, 2016. The verification report(s) is/are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.

Composite Description: The European Equity - Concentrated composite provides long-term total returns principally through capital appreciation. Portfolios invest primarily in equity securities of established European companies. Portfolios follow a concentrated approach of 25 - 50 positions.

Benchmark: The benchmark is the MSCI Europe net of taxes index, Reported in EUR.

Gross of Fees: Gross of fees performance is presented gross of all fees, but after all trading expenses.

Net of Fees: Net of fee performance is calculated using the maximum stated annual fee of 0.65% calculated and applied monthly.

Performance Calculations: Results are based on all fully discretionary accounts meeting the composite definition, including those accounts no longer with the firm. Returns are shown in Euros, and include the reinvestment of all income. Additional information regarding policies for valuing portfolios, calculating performance, and preparing presentations is available upon request. Past performance is not indicative of future results.

Composite Dispersion: The composite dispersion of annual returns is indicated by the performance of individual accounts representing the equal weighted standard deviation of returns. Dispersion of returns is calculated for portfolios included in the composite for the full year.

3-Year Standard Deviation: Periods with less than 3 years of data will show "n/a".

Derivatives, Leverage and Short Positions: The portfolios may use derivatives for hedging purposes, and may also use derivatives such as options, futures, forwards and swaps for non-hedging purposes as a substitute for direct investment, as long as the portfolio's use of derivatives is consistent with its investment objectives. Currency hedging is used primarily as a risk management tool to limit the volatility of portfolio returns and may be used tactically to enhance returns. Currency hedge ratios can range between 0-100%, depending on asset class and mandate. No leverage has been used in any of the portfolios contained in the composite.

Fee Schedule: Advisory fees are described on this page and on Form ADV Part 2A. RBC GAM reserves the right to negotiate all advisory fees.

Minimum Account Size: Currently there is no minimum account size in order to be included in this composite.

Creation Date: This composite was created on May 1, 2015.
