Management Company: Candriam Luxembourg

Objectives and Investment Policy

The Fund aims to provide long-term capital appreciation through targeted investments in a diversified mix of global companies operating in various countries around the world across a range of sectors. The Fund shall not invest in issuers and index replicating vehicles that are excluded by the Norges Bank Investment Management Observation and Exclusion of Companies List.

Risk and Reward Profile

◆ Lower risk			Higher risk ◆			
◆ Typically lower rewards			Typically higher rewards ◆			
1	2	3	4	5	6	7

The Risk and Reward Indicator table illustrates where the share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward, but also the greater the risk of losing money. The table uses a standard calculation method that is used by all companies who offer such funds within the European Union.

Please note that the lowest category does not mean a risk-free investment.

The shaded area in the table above shows the Class's ranking based on the Synthetic Risk and Reward Indicator. It is based upon how much the price of the Class has moved up and down in the past.

The share class is ranked at 6, because it invests in equity securities located in various countries around the world and across a range of sectors whose values tend to fluctuate more widely. Please note that the calculation is based on past

information and may not reliably predict how the share class will perform in the future. Its ranking may shift over time and therefore is not guaranteed to remain unchanged.

The Risk and Reward Indicator does not take into account the following:

- The value of the assets in the Fund may be affected by uncertainties in government policies, taxation, social and religious instability, and political or other developments in the law or regulations of the countries which the Fund may invest in.
- There is no guarantee that the Fund can prevent liquidity risks. In highly volatile markets, certain securities may become less liquid, which means they cannot be sold as quickly or easily. Some securities may be illiquid because of legal restrictions, the nature of the investment and certain features such as guarantees or a lack of buyers interest in the particular security or market.
- There is no guarantee that the Fund can prevent currency risks. The Fund may use derivatives to reduce or manage the risk.
